SANTIAGO PÉREZ LOSANOVSCKY

GAME & SYSTEMS DESIGNER | LEVEL DESIGNER | UNREAL ENGINE

Buenos Aires, Argentina • santiagolovsky@gmail.com • linkedin.com/in/santiago-perez-losanovscky-a91877172

PROFESSIONAL SUMMARY

Game and systems designer with 7+ years of experience across gameplay, systems and level design, mobile and VR production, product ownership, and design leadership. Hands-on in Unreal Engine and Blueprints across investigation, combat, AI, player interactions, level scripting, UI and data-driven content. Translate ambiguous creative goals into playable systems, clear documentation and practical multidisciplinary workflows.

CORE SKILLS

Game Design • Systems Design • Level Design • Technical Design • Narrative & Environmental Design • Unreal Engine • Blueprints • Unity • Gameplay Prototyping • AI / Behavior Trees / Navigation • Level Implementation • UI / Widgets • Documentation • Playtesting & QA

SELECTED PROJECTS

Hollow Graves — Independent Unreal Engine Horror Project | 2025–Present

- Lead creative direction, game/systems and level design, investigation and clue systems, narrative/worldbuilding, UI/UX, AI/gameplay logic, Blueprint architecture, documentation and production planning.
- Build systemic exploration and investigation directly in UE: data-driven clues, player knowledge/progression, focus interactions, gameplay UI and a structured level-design workflow from design criteria to greybox and iteration.

Reditus Umbrae — Unreal Engine Dark-Fantasy Action Roguelite Prototype | 2026–Present

- Lead hands-on game/systems design and development for a collaborative action roguelite, spanning combat, encounter and arena flow, enemy behaviors, progression/upgrades, animation integration and production planning.
- Built a playable top-down combat prototype with melee combos, charged heavy attacks, ranged attacks, dash, enemy archetypes/AI, wave and room flow, XP/level-ups, configurable upgrades and combat feedback.

Dreadwoods — Unreal Engine Folkloric Horror Prototype | 2026–Present

- Design and implement exploration- and narrative-driven folklore horror centered on interactive sequences, environmental storytelling, supernatural encounters and player powers rather than conventional combat.
- Integrate Unreal Sequencer with Blueprint dialogue and gameplay logic for branching/looping sequence segments, gameplay-triggered events, slow-motion interactions and Witch, Beast and Luz Mala prototype encounters.

Drill to the Rend — Independent Unreal Engine FPS / Survivor Prototype | 2025

- Designed and built a solo playable prototype with adaptive enemies, Behavior Tree AI/navigation, weapon switching, elemental combat, spawning/waves, progression/upgrades, UI and a boss encounter.
- Structured enemy defenses and elemental counters for readable tactical decisions, modular encounter variants and efficient iteration.

PROFESSIONAL EXPERIENCE

Aconcagua Games — Product Owner / Lead Game Designer | May 2022–Sep 2024

- Led design and product ownership across multiple mobile projects, including released Fulbo Galaxy; owned mechanics, progression, statistics, balancing, tutorials, level structures, and rewards.
- Designed and balanced levels, defined representative content and guidelines, and led a small Game/Level Design team through implementation review and client delivery.
- Produced GDDs, feature specifications, UX/UI references and balance sheets; worked hands-on in Unity and coordinated programming, art, QA and production across concurrent projects.

Pixowl — Match Island — Game Designer / Level Designer | Sep 2020–Jan 2022

- Designed and balanced mobile Match-3 levels, mechanics, progression and tutorials; developed high-volume content-production language, standards and validation workflows.
- Coordinated external providers and supported up to three level designers through briefs, reviews, validation and balancing.
- Built and reviewed content in Unity and proprietary tools, using player-testing data to iterate difficulty and progression with programming, art and QA.

Image Campus — Professor, Game Design | Apr 2022–Present

- Design and teach Game Design, Systems Design, Level Design, Unreal Engine Blueprints and Game Prototyping; created an Unreal Prototyping Laboratory that expanded into a year-long learning path.
- Teach Blueprint scripting, gameplay systems, Behavior Trees/navigation, Animation Blueprints, UI/widgets, interfaces, materials and level implementation.
- Mentor students through concept, scope, iteration, documentation, playable prototypes/MVPs and early career decisions.

Aobscura Games (formerly Fin Del Mundo Games) — Creative Director | Nov 2021–Present

- Lead original independent game development from concept through prototype across creative direction, game/systems and level design, narrative, production and Unreal implementation.
- Have directed multidisciplinary collaborations of approximately sixteen contributors across design, art and development; mentor juniors, define workflows and review work.

VR Health — Lead Game Designer (Pro Bono) | Oct 2020–Jun 2021

- Led the redesign of a therapeutic VR initiative with Hospital Italiano de Buenos Aires, translating therapist requirements into gameplay, narrative and level-design decisions.
- Served as primary designer/documentation lead, working around accessibility, patient-specific constraints, comfort, cognitive/motor demands and specialist validation.

Independent Game Studio — Lead Game Designer / Producer / ScrumMaster | Jan 2019–Sep 2020

- Co-founded a six-person Unreal Engine PC project, leading design, documentation and early in-engine level work while managing backlog, milestones, scope and sprint reviews.

COTO CICSA — Game Designer | Apr 2019–Nov 2019

- Designed gameplay and levels and performed QA for a multiplayer children's VR project in Unity on Oculus hardware.

Independent — Author & Writer | 2009–Present

- Write and independently publish original fiction focused on horror, worldbuilding, narrative structure, dialogue and characters; apply these skills to game narrative and environmental storytelling.

EDUCATION & TRAINING

Tecnicatura Superior en Animación 3D para Videojuegos — Image Campus | Mar 2025–Present

Experto Universitario en Programación con Unreal — UTN FRBA | Feb–Jul 2025

ScrumMaster — Liqueed | May–Aug 2024

INMERSIVAS: VR Interaction Design with Unreal Engine — Image Campus | 2020–Jan 2021

Trayecto de Game Design — Image Campus | 2018
